FERRO CORP

Cleveland, OH / Washington, PA

Project Overview:

Onex Construction performs bi-monthly inspection and repairs on eight different smelter furnaces. Onex works with the plant engineer to determine scope, cost and degree of repairs necessary. This includes performing required demolition and new installation of refractory materials. Onex also is the owners' representative for supplying special shapes and fabrications as related to the burners and spouts. The annual repairs and material supply exceeds \$1 million.

- Glass Smelting Furnaces (8)
- Tunnel Kilns
- Shuttle Kilns
- Customer for over 16 years
