US STEEL TUBULAR

Lorain, OH

Project Overview:

Onex Construction was a subcontractor while performing the refractory insulation on this project. Both furnaces consisted of an IFB hearth and a ceramic fiber module roof. Proper scheduling and coordination were required to perform tasks on both furnaces simultaneously while completing the project on-time.

- Two Furnaces: Austenizing and Tempering Furnace Design
- Installed over 100,000 firebrick and 10,000 modules
- 54' x 50' and 75' x 54' Furnace Sizes
- Completed ahead of schedule and under budget in Spring 2011
- Over 10,000 Man Hours used
- Zero recordable injuries
