VM STAR 2

Youngstown, OH

Project Overview:

Onex Construction was a subcontractor to AIS while performing the refractory portion of this project. Both furnaces consisted of casted walls and hearth, as well as a ceramic fiber module roof. Proper scheduling and coordination were required to perform tasks on both furnaces simultaneously while all other trades were working concurrently within the footprint of both furnaces. The project was completed ahead of the proposed refractory schedule.

- Two Furnaces: Austenizing and Tempering
- Tenova Core Furnace Design
- Installed over 500,000 of castable and 6,000 modules
- 54' x 52' and 54' x 46' Furnace Sizes
- Completed ahead of schedule and under budget in January 2013
- Over 20,000 Man Hours used
